MASTICE 2000 TRASPARENTE LIQUIDO B00

Safety Data Sheet

According to Annex II to REACH - Regulation (EU) 2020/878 and to Annex II to UK REACH

SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Code: 303MTRL - 303MTRL00750 - 303MTRL04 - 303MTRL18
Product name: MASTICE 2000 TRASPARENTE LIQUIDO B00
UFI: QDA0-60P5-T001-Q3UG

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use: Transparent resin for bonding and impregnation

Identified Uses	Industrial	Professional	Consumer
Putty	-	PC: 1. LCS: PW.	-

1.3. Details of the supplier of the safety data sheet

Name: BELLINZONI S.R.L.
Full address: Via Mezzano 64
District and Country: 28069 Trecate (NO)
Italy
Tel. +39 0321 770558

e-mail address of the competent person

responsible for the Safety Data Sheet

Supplier: laboratorio@bellinzoni.com
BELLINZONI S.r.l.**1.4. Emergency telephone number**

For urgent inquiries refer to

- CAV "Osp. Pediatrico Bambino Gesù" Dip. Emergenza e Accettazione DEA – Roma - Piazza Sant'Onofrio, 4 CAP: 00165 – Telefono: 06 68593726 – Responsabile: Marco Marano
- Az. Osp. Univ. Foggia – Foggia - V.le Luigi Pinto, 1 – CAP: 71122 – Telefono: 800183459 – Responsabile: Anna Lepore
- Az. Osp. "A. Cardarelli" – Napoli - Via A. Cardarelli, 9 – CAP: 80131081- Telefono: 5453333 – Responsabile: Romolo Villani

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 2/22 Replaced revision:1 (Printed on: 13/01/2021)

SECTION 2. Hazards identification

2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent amendments and supplements). The product thus requires a safety datasheet that complies with the provisions of (EU) Regulation 2020/878. Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Hazard classification and indication:

Flammable liquid, category 3	H226	Flammable liquid and vapour.
Reproductive toxicity, category 2	H361d	Suspected of damaging the unborn child.
Specific target organ toxicity - repeated exposure, category 1	H372	Causes damage to the ear through prolonged or repeated exposure by inhalation
Eye irritation, category 2	H319	Causes serious eye irritation.
Skin irritation, category 2	H315	Causes skin irritation.
Specific target organ toxicity - single exposure, category 3	H335	May cause respiratory irritation.
Skin sensitization, category 1A	H317	May cause an allergic skin reaction.
Hazardous to the aquatic environment, chronic toxicity, category 3	H412	Harmful to aquatic life with long lasting effects.

2.2. Label elements

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words: Danger

Hazard statements:

H226	Flammable liquid and vapour.
H361d	Suspected of damaging the unborn child.
H372	Causes damage to the ear through prolonged or repeated exposure by inhalation
H319	Causes serious eye irritation.
H315	Causes skin irritation.
H335	May cause respiratory irritation.
H317	May cause an allergic skin reaction.
H412	Harmful to aquatic life with long lasting effects.
EUH210	Safety data sheet available on request.

Precautionary statements:

P202	Do not handle until all safety precautions have been read and understood.
P260	Do not breathe vapours
P280	Wear protective gloves / eye protection / face protection.
P403+P233	Store in a well-ventilated place. Keep container tightly closed.

Contains: STYRENE, MALEIC ANHYDRIDE

2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage $\geq$ than 0,1%.
The product does not contain substances with endocrine disrupting properties in concentration $\geq$ 0.1%.

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 3/22 Replaced revision:1 (Printed on: 13/01/2021)

SECTION 3. Composition/information on ingredients

3.1. Substances

Information not relevant

3.2. Mixtures

Contains:

The full wording of hazard (H) phrases is given in section 16 of the sheet.

STYRENE

Classification note according to Annex VI of the CLP Regulation: D

This product is not classified H304 due to its high viscosity.

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 4/22 Replaced revision:1 (Printed on: 13/01/2021)

SECTION 4. First aid measures

4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 30-60 minutes, opening the eyelids fully. Get medical advice/attention.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention.

INGESTION: Have the subject drink as much water as possible. Get medical advice/attention. Do not induce vomiting unless explicitly authorised by a doctor.

INHALATION: Get medical advice/attention immediately. Remove victim to fresh air, away from the accident scene. If the subject stops breathing, administer artificial respiration. Take suitable precautions for rescue workers.

4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

4.3. Indication of any immediate medical attention and special treatment needed

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT

Extinguishing substances are: carbon dioxide, foam, chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

Send away individuals who are not suitably equipped. Use explosion-proof equipment. Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site.

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 5/22 Replaced revision:1 (Printed on: 13/01/2021)

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat. Avoid leakage of the product into the environment.

7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store in a cool and well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

STYRENE

Value: 400 mg / g creatinine - moderate: Urine - Biological Indicator: Mandelic acid + phenylglyoxylic acid in urine - Collection Period: End of shift Value: 40 mg / l creatinine - moderate: Urine - Biological Indicator: Styrene in urine - Period Withdrawal: End of the shift

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

Exposure levels must be kept as low as possible to avoid significant build-up in the organism. Manage personal protective equipment so as to guarantee maximum protection (e.g. reduction in replacement times).

HAND PROTECTION

Protect hands with category III work gloves.

The following should be considered when choosing work glove material (see standard EN 374): compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Nitrile gloves according to EN374 class 3 (F) permeation time > 60 minutes. Material thickness 0.4 mm. Gloves should be discarded and replaced if there is any sign of degradation or chemical transfer. The effective duration of the protection provided depends on the conditions of use; consult the supplier.

Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion.

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 11/22 Replaced revision:1 (Printed on: 13/01/2021)

EYE PROTECTION

Use closed safety visors or hermetic protective goggles (e.g. EN166 F3), do not use eye lenses.

In the presence of risks of exposure to splashes or squirts during work, adequate mouth, nose and eye protection should be used to prevent accidental absorption.

RESPIRATORY PROTECTION

Use an adequate respiratory protection device, mask with filter "A", brown, for organic gases and vapors with boiling point >65°C.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

Properties	Value	Information
Appearance	liquid	
Colour	straw yellow	
Odour	characteristic	Substance:STYRENE
Odour threshold	-31°C	
Melting point / freezing point	not available	
Initial boiling point	145 °C	Substance:STYRENE
Flammability	Flam. Liq. 3, H226	Substance:STYRENE
Lower explosive limit	not available	Concentration: 1,1 % Substance:STYRENE
Upper explosive limit	not available	Concentration: 8,9 % Substance:STYRENE
Flash point	32 °C	Substance:STYRENE
Auto-ignition temperature	490 °C	Substance:STYRENE
Decomposition temperature	not available	
pH	not available	Reason for missing data:the mixture is not polar / aprotic
Kinematic viscosity	> 20,5 mm ² /s	Temperature: 40 °C
Solubility	insoluble in water	
Partition coefficient: n-octanol/water	not available	Reason for missing data:The product is a blend
Vapour pressure	6,7 hPa	Substance:STYRENE
Density and/or relative density	1,116 g/cm ³	
Relative vapour density	3,6 (air = 1)	Substance:STYRENE
Particle characteristics	not applicable	

9.2. Other information

9.2.1. Information with regard to physical hazard classes

Information not available

9.2.2. Other safety characteristics

Total solids (250°C / 482°F)	63,00 %	
VOC (Directive 2010/75/EU)	37,00 % - 412,92 g/litre	
VOC (volatile carbon)	32,00 % - 357,12 g/litre	
Explosive properties	not explosive	Remark:it does not contain substances classified as explosive
Oxidising properties	not oxidizing	Remark:it does not contain substances classified as oxidizing

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 12/22 Replaced revision:1 (Printed on: 13/01/2021)

SECTION 10. Stability and reactivity

10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

STYRENE

Polymerises at temperatures above 65°C/149°F. Fire hazard. Possibility of explosion.

10.2. Chemical stability

The product is stable in normal conditions of use and storage.

10.3. Possibility of hazardous reactions

May catch fire on contact with oxidizing mineral acids, strong oxidizing agents.
Exothermic reaction with: Chlorosulfonic acid, Oxidizing agents, Chlorine, with Iron
Violent polymerization can be caused by: sodium aluminum chloride
Risk of explosion with: Strong acids, polymerisation initiators, Peroxides, Oxygen, with Heat.

The vapours may also form explosive mixtures with the air.

STYRENE

May react dangerously with: peroxides, strong acids. May polymerise on contact with: aluminium trichloride, azobisisobutyronitrile, dibenzoyl peroxide, sodium. Risk of explosion on contact with: butyllithium, chlorosulphuric acid, di-tert-butyl peroxide, oxidising substances, oxygen.

ETHANOL

Risk of explosion on contact with: alkaline metals, alkaline oxides, calcium hypochlorite, sulphur monofluoride, acetic anhydride, acids, concentrated hydrogen peroxide, perchlorates, perchloric acid, perchloronitrile, mercury nitrate, nitric acid, silver, silver nitrate, ammonia, silver oxide, ammonia, strong oxidising agents, nitrogen dioxide. May react dangerously with: bromoacetylene, chlorine acetylene, bromine trifluoride, chromium trioxide, chromyl chloride, fluorine, potassium tert-butoxide, lithium hydride, phosphorus trioxide, black platinum, zirconium (IV) chloride, zirconium (IV) iodide. Forms explosive mixtures with: air.

10.4. Conditions to avoid

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

STYRENE

Avoid contact with: oxidising substances, copper, strong acids.

ETHANOL

Avoid exposure to: sources of heat, naked flames.

10.5. Incompatible materials

Avoid contact with combustible materials. The product could catch fire

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 13/22 Replaced revision:1 (Printed on: 13/01/2021)

STYRENE

Incompatible materials: plastic materials.

10.6. Hazardous decomposition products

Carbon oxides, Aromatic hydrocarbons.

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

SECTION 11. Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

STYRENE

It can be fatal if swallowed and if it enters the respiratory tract. Styrene possesses genotoxic potentials in vitro, which apparently reflect conversion to styrene oxide. There is no evidence, based on available animal and human data, that styrene has a significant mutagenic / clastogenic potential in vivo. Chronic inhalation caused hyperplasia and fibrosis and an increased incidence of late-onset lung tumors in mice, presumed to arise from a non-genotoxic mechanism. The incidence of tumors in rats did not suffer changes following exposure by chronic inhalation. There is no evidence that styrene has significant carcinogenic potential in humans. Reproductive toxicity studies conducted in animals exposed via drinking water or inhalation have shown that styrene is not selectively toxic to testes or ovaries, and no adverse effects on fertility have been observed. From animal studies it turns out that styrene is not teratogenic, nor is foetotoxicity detected at toxic treatment levels in sub-pregnancy. No selective effects have been reported during nervous system development. Some developmental delay was observed in unborn babies whose mothers were exposed to high dose levels (500 ppm). However, these findings were attributed to a weight loss of the unborn, rather than a selective effect on progeny.

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

STYRENE

WORKERS: inhalation; contact with the skin.

Delayed and immediate effects as well as chronic effects from short and long-term exposure

STYRENE

The acute toxicity by inhalation at 1000 ppm affects the central nervous system with headache and dizziness, lack of coordination; irritation of the eye and respiratory tract mucous membranes occurs at 500 ppm. Chronic exposure causes depression of the central and peripheral nervous system with loss of memory, headache and drowsiness starting at 20 ppm; digestive disorders with nausea and loss of appetite; irritation of the respiratory tract with chronic bronchitis; dermatosis. Repeated exposure, at low doses of inhaled substance, causes irreversible changes to hearing and may cause changes in colour vision. No certain data is available on the reversibility of the visual impairment. Repeated skin exposure causes irritation. The substance degrades the skin, which can cause dryness and cracking.

Interactive effects

STYRENE

The metabolism of the substance is inhibited by ethanol. When styrene is photo-oxidised with ozone and nitrogen dioxide, as in the formation of smog, products highly irritating for the human eye may ensue.

ACUTE TOXICITY

ATE (Inhalation - vapours) of the mixture:	> 20 mg/l
ATE (Oral) of the mixture:	>2000 mg/kg

REPRODUCTIVE TOXICITY

Suspected of damaging the unborn child

STOT - SINGLE EXPOSURE

May cause respiratory irritation

STOT - REPEATED EXPOSURE

Causes damage to organs

STYRENE

specific target organ toxicity (STOT) - repeated exposure:

Test: LOAEL (C) - Route: Oral - Species: Rat = 2000 mg / kg - Notes: bw / day

Test: NOAEL (C) - Route: Oral - Species: Rat = 1000 mg / kg - Notes: bw / day

Test: LOAEL (C) - Route: Inhalation - Species: Rat = 0.21 mg / l

ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class Viscosity: > 20,5 mm2/s

11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

SECTION 12. Ecological information

This product is dangerous for the environment and the aquatic organisms. In the long term, it have negative effects on aquatic environment.

12.1. Toxicity

STYRENE

LC50 - for Fish	4,02 mg/l/96h Pimephales promelas
EC50 - for Crustacea	4,7 mg/l/48h Daphnia magna
EC50 - for Algae / Aquatic Plants	4,9 mg/l/72h Selenastrum capricornutum

	MASTICE 2000 TRASPARENTE LIQUIDO B00		Dated 03/03/2023 Printed on 06/03/2023 Page n. 16/22 Replaced revision:1 (Printed on: 13/01/2021)

ETHANOL	
LC50 - for Fish	14200 mg/l/96h freshwater fish
EC50 - for Crustacea	5012 mg/l/48h freshwater invertebrates
EC50 - for Algae / Aquatic Plants	275 mg/l/72h freshwater algae
Chronic NOEC for Crustacea	9,6 mg/l freshwater invertebrates
Chronic NOEC for Algae / Aquatic Plants	11,5 mg/l freshwater algae
PROPAN-2-OL	
LC50 - for Fish	9640 mg/l/96h Pimephales promelas
EC50 - for Crustacea	> 1000 mg/l/48h Daphnia magna
EC50 - for Algae / Aquatic Plants	> 1000 mg/l/72h Desmodesmus subcapitatus

12.2. Persistence and degradability

STYRENE	
Solubility in water	320 mg/l
Rapidly degradable	
MALEIC ANHYDRIDE	
Solubility in water	> 10000 mg/l
Entirely degradable	
N, N-BIS- (2-HYDROXYPROPYL) -P-TOLUIDINE	
Solubility in water	7 g/l
Entirely degradable	
ETHANOL	
Solubility in water	1000 - 10000 mg/l
Rapidly degradable	
PROPAN-2-OL	
Rapidly degradable	

12.3. Bioaccumulative potential

STYRENE	
Partition coefficient: n-octanol/water	2,96
BCF	74
MALEIC ANHYDRIDE	
Partition coefficient: n-octanol/water	-2,78
N, N-BIS- (2-HYDROXYPROPYL) -P-TOLUIDINE	
Partition coefficient: n-octanol/water	2,1
ETHANOL	
Partition coefficient: n-octanol/water	-0,35

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 17/22 Replaced revision:1 (Printed on: 13/01/2021)

PROPAN-2-OL

Partition coefficient: n-octanol/water0,05

12.4. Mobility in soil

Do not mix with waste water, rain water, water surfaces. It floats on water, evaporates from liquid surfaces and soils but a significant proportion can penetrate and pollute groundwater.

STYRENE

Partition coefficient: soil/water2,55

N, N-BIS- (2-HYDROXYPROPYL) -P-TOLUIDINE

Partition coefficient: soil/water1,78

12.5. Results of PBT and vPvB assessment

On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.

12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

12.7. Other adverse effects

Information not available

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

SECTION 14. Transport information

14.1. UN number or ID number

ADR / RID, IMDG, IATA:3269

The product, if packaged in packages of less than 450 litres, is not subject to ADR regulations as stated in 2.2.3.1.5.

The product, if packaged in packages of less than 450 litres, is not subject to obligations relating to marking, labelling and package testing in accordance with 2.3.2.5 of the IMDG CODE.

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 18/22 Replaced revision:1 (Printed on: 13/01/2021)

14.2. UN proper shipping name

ADR / RID: POLYESTER RESIN KIT
IMDG: POLYESTER RESIN KIT
IATA: POLYESTER RESIN KIT

14.3. Transport hazard class(es)

ADR / RID: Class: 3 Label: 3
IMDG: Class: 3 Label: 3
IATA: Class: 3 Label: 3

14.4. Packing group

ADR / RID, IMDG, IATA: III

14.5. Environmental hazards

ADR / RID: NO
IMDG: NO
IATA: NO

14.6. Special precautions for user

ADR / RID:	HIN - Kemler: --	Limited Quantities: 5 L	Tunnel restriction code: (E)
	Special provision: -		
IMDG:	EMS: F-E, S-D	Limited Quantities: 5 L	
IATA:	Cargo:	Maximum quantity: 10 Kg	Packaging instructions: 370
	Passengers:	Maximum quantity: 10 Kg	Packaging instructions: 370
	Special provision:	A163	

14.7. Maritime transport in bulk according to IMO instruments

Information not relevant

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 19/22 Replaced revision:1 (Printed on: 13/01/2021)

SECTION 15. Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Seveso Category - Directive 2012/18/EU: P5c

Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006

Product

Point 3 - 40

Contained substance

Point 75

Regulation (EU) 2019/1148 - on the marketing and use of explosives precursors

not applicable

Substances in Candidate List (Art. 59 REACH)

On the basis of available data, the product does not contain any SVHC in percentage $\geq$ than 0,1%.

Substances subject to authorisation (Annex XIV REACH)

None

Substances subject to exportation reporting pursuant to Regulation (EU) 649/2012:

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

Healthcare controls

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

15.2. Chemical safety assessment

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

	BELLINZONI S.R.L.	Revision nr. 2
	MASTICE 2000 TRASPARENTE LIQUIDO B00	Dated 03/03/2023 Printed on 06/03/2023 Page n. 20/22 Replaced revision:1 (Printed on: 13/01/2021)

SECTION 16. Other information

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Flam. Liq. 2	Flammable liquid, category 2
Flam. Liq. 3	Flammable liquid, category 3
Repr. 2	Reproductive toxicity, category 2
Acute Tox. 2	Acute toxicity, category 2

- TWA STEL: Short-term exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very Persistent and very Bioaccumulative as for REACH Regulation
- WGK: Water hazard classes (German).

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.
