

PS3121 PRESSED 60/40 DOUBLE BOWL

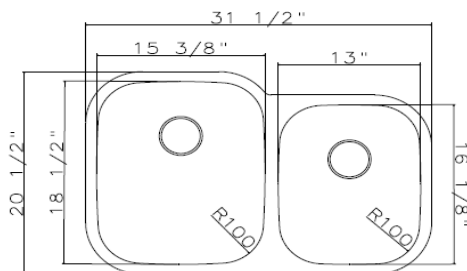

The PS3121 Double bowl undermount sink is constructed with 304 Series stainless steel. 304 Series or "surgical grade" stainless steel is nonporous, hygienic, rust-free, and extremely durable.

Its satin brush finish creates an enduring, easy-to-clean luster and is designed to conceal small scratches that occur during normal usage. The bottom has an undercoating applied and is fitted with sound-deadening pads.

Both features help deaden sound attenuation and act to reduce condensation buildup on the bottom of the sink that could lead to moisture problems in the base of the cabinet that the sink is installed in.
